TERMS.

TS400
P75

Cash in Thirty Days. No deviation from these terms except by special arrangement.

All accounts not paid at maturity subject to Sight Draft, without notice.

All orders will be filled from stock, as far as possible, in the order of their receipt, and unfilled balances (if any,) will be forwarded as soon as the goods are received from factories.

Prices subject to change without notice.

We cannot assume any responsibility for goods sent in to pack, or for goods ordered of us to be sent elsewhere to pack, although we will use our best endeavors to accommodate our customers in such cases.

Goods at risk of purchaser, after shipment.

We will not allow claims for deductions, unless made within five days after receipt of goods.

We will not pay Exchange on Bank Notes, or Expressage on money sent to us.

Barb Wire.

CACTUS INTERLOCKED FOUR POINT STEEL BARB WIRE.

Barbs Fastened Between the Wires.

END VIEW OF BARB.

Licensed Under all the Patents of the Washburn & Moen Manufacturing Company and I. L. Ellwood & Co.

Of the different Four Point Barb Wire devices, having one *or more* of the points pass between the cable wires, this is by far the *best* and lightest in weight, being but slightly over one pound to the rod. A glance at the cut will show this, but an examination of the sample will demonstrate it fully. The wires used in the barbs pass around both the cables, as well as between them, so that the barbs are securely fastened around both the wires in the cable, as well as passing between them, which locks them securely in place.

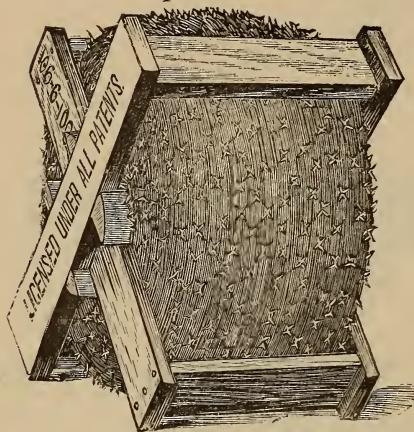

PRICE—Painted,..... 10 cents per pound, net.

Galvanized,.... 11 “ “ “

For Special Prices, see our Monthly Bulletin.

Barb Wire.

Spool of our Barb Wire ready for Shipment.

Take notice that all spools of Barb Wire shipped by us are securely boxed, making the spools strong and secure, so that they reach you in good order and not broken, as is the case with wire shipped by other makers. We put the wire up on small or "pony" spools of fifty or sixty pounds each, without extra charge, when required by our customers.

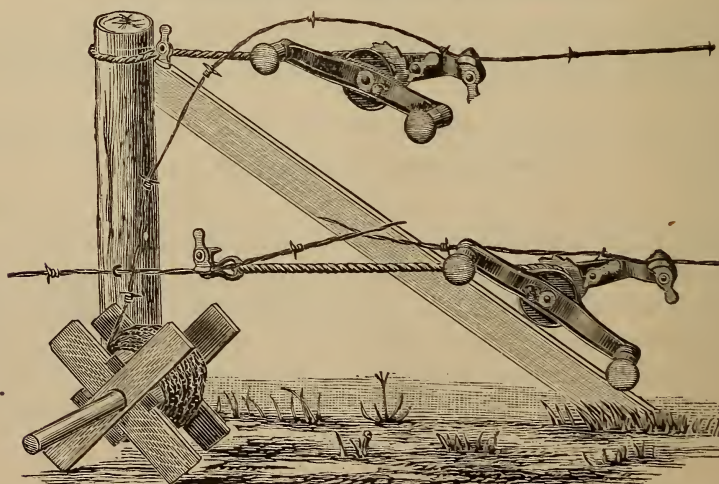

Improved Fence Staples with Long Shear Points.

Galvanized and Self-Colored. 92 to the pound.

PRICE—Self Colored,.....	cents per pound, net.
Galvanized,	" " "

The Samson Wire Stretcher.

EXAMINE THIS CUT.

\$9 PER DOZEN.

We wish to call your special notice to this new invention. We consider it the best wire stretcher in the market. It is strongly made, easily operated and very durable. We can recommend it unqualifiedly. Do not be put off with any other. To remove the tension, invert the machine and slack back enough to let the Pawl drop.

Barb Fence.

THE BUCK-THORN OR RAILROAD.

The Buck-Thorn Fencing is not wire, and no wire enters into its composition. It is a solid strip of steel, rolled, not drawn, with short, triangular points, one inch apart. It is twisted so that these points are presented at four inches apart from every direction—right and left, above and below. It is very strong, and presents the largest possible surface to view.

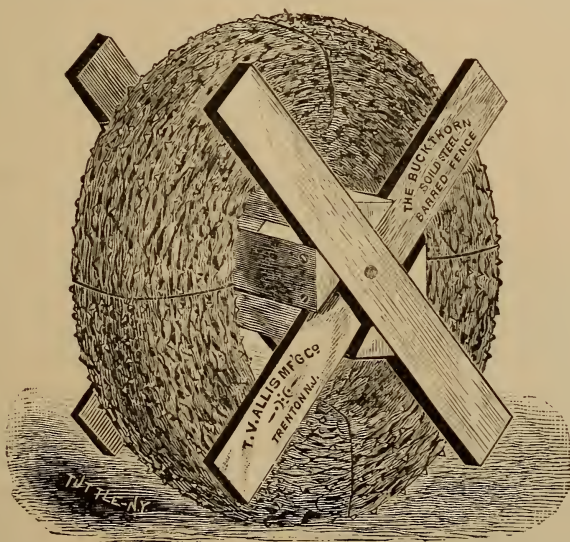

The barbs cannot possibly become loosened, while there are no cracks, crevices or joints to catch and hold rainwater, dew or moisture, formed by condensation; therefore, the fence cannot be damaged or destroyed by rust.

The barbs are short and lance-shaped, so that there is no danger of injury to stock from coming in contact with them. They will prick and scratch, but never tear the skin, because their form always tends to draw out of the flesh instead of into it. It is well known that the sensation of pain is at the surface of the skin, hence the smart thrust or prick of a thorn (where there is no danger of tearing) is all that is required. No wounds are made, consequently no loss of cattle in the southwest from putrefying sores in which flies deposit their eggs.

The barbs are numerous and wide at their base, and the surface of the strand is broad. These three most desirable properties render the fence easily seen by animals, and are of great value in preventing accidents from collision.

The Buck-Thorn Fencing on Spool.

**This Fence is used exclusively by the
N. Y. C. & H. R. R. R., and other Rail-
roads.**

Galvanized Buck-Thorn Fence,...	11 cents per pound
Painted,	" " "
" " " " " " " "	...10 " "

Price List.

The Buck-Thorn Fencing averages about fourteen feet to the pound, and costs no more than the best of the ordinary barbed wires, while its superiority cannot be questioned. It is very much stronger, *is plainly seen by animals*, and will last many years longer than any other barbed or wooden fence ever made. It is most effectual in its protection, *and is not cruel or harsh*. It is easy to put up and tighten. No barbed fencing ever made equals THE BUCK-THORN.

For Special Prices, See our Monthly Bulletin.

Buffalo Portable Forges.

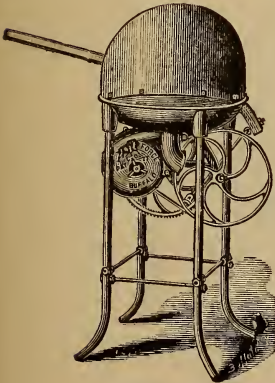

Forge No. 7, Price \$16.00.

Forge No. 8, Price \$18.00.

Fan, 5 in., Height, 15 in., Diameter, 15 in., Weight, 50 lbs.

These Forges are especially intended for light work, being very compact and light, and can be easily moved about; have short legs, so when used are to be set on a box or bench, and will produce a welding heat on one-inch iron in *five minutes*. Heavier work can be done if desired.

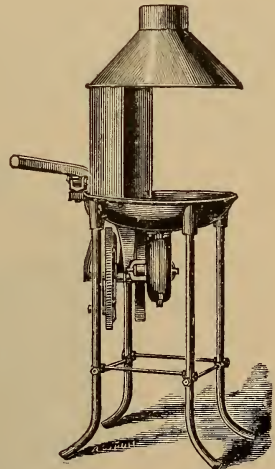

Forge No. 5, Price \$24.00.

DISCOUNT.....

Forge No. 5, height, 33 in.; size of hearth, 18 in. diam.; weight, 70 lbs.

Forge No. 5, same capacity as No. 4, and is especially adapted for the use of boiler makers, repairers, tank builders, miners and prospectors.

C

Forge No. 4, with Hood, Price \$27.00.

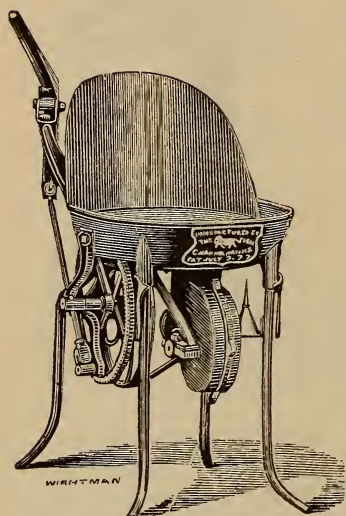

DISCOUNT.....

Forge No. 4, half open hood, height, 33 in.; size of hearth, 18 in. diam.; weight, 75 lbs.

Forges No. 4 and 5 will produce a welding heat on iron one a half inch in diameter in five minutes.

For Special Prices, See our Monthly Bulletin.

Buffalo Portable Forges.

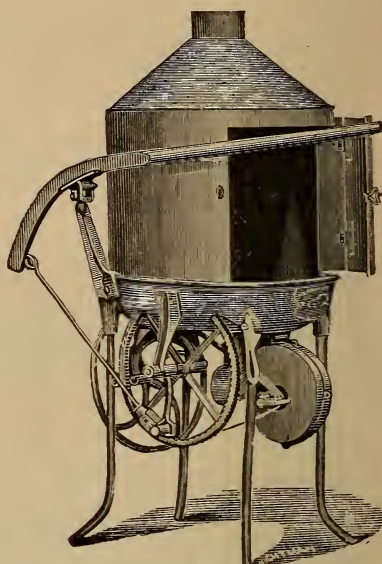

Forge No. 3, Price \$36.00.

DISCOUNT.....

Forge No. 3, height, 29 in.; fan, 8 in.; hearth, 21x27 in.; weight, 140 lbs.

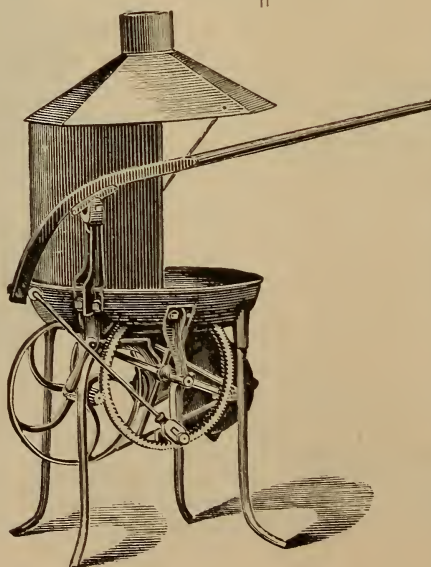

Forge No. 3 has four drop handles for convenience of moving from place to place, with deep fireplace. It is especially adapted for the use of boiler makers, iron bridge and ship builders.

Forge No. 2, Price \$42.00.

DISCOUNT.....

Forge No. 2, closed hood, same capacity as Blacksmiths' Forge No. 1; weight, 155 lbs.

Forge No. 1, with Hood, Price \$40.00.

DISCOUNT.....

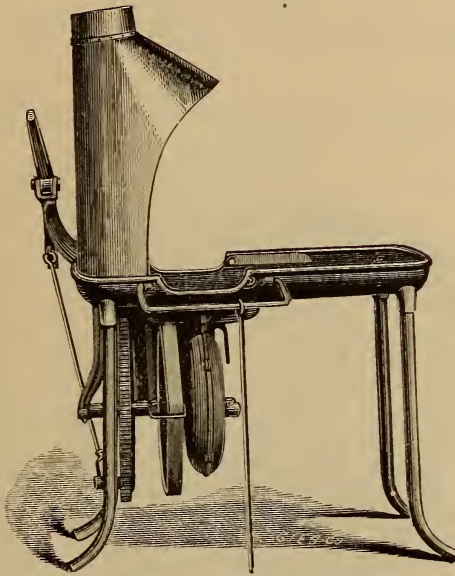

Forge No. 1, height, 29 in.; fan, 8 in.; hearth, 21x27 in.; weight, 145 lbs.
Forge No. 1 will produce a welding heat on iron two and a half inches in diameter in five minutes, and no heavier iron if required.

For Special Prices, See our Monthly Bulletin.

Buffalo Blacksmiths' Forges.

Forge No. 0. Price \$50.00.

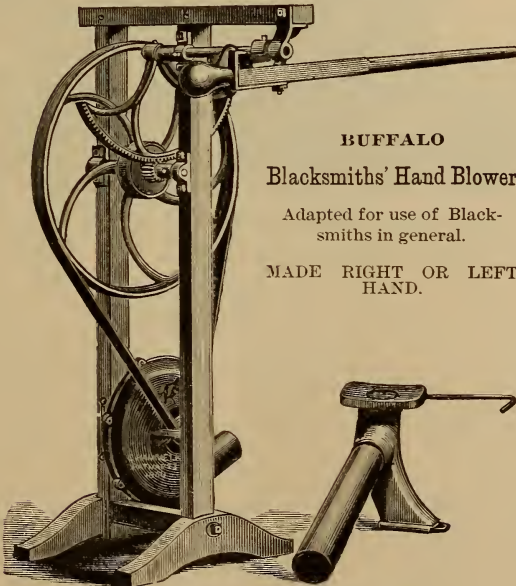

DISCOUNT.....

Height, 30 in ; size of hearth, 28x40; fan, 12 in.; weight, 250 lbs
Forge No. 0 is especially adapted for heavy blacksmith work, having a large fire-place, with sufficient blast to do heaviest kind of work; will heat $3\frac{1}{2}$ to 4 in. round iron in 10 minutes.

The Safety Tubular Lantern.

An Invaluable Improvement to the Genuine Tubular Lantern.

SAFE, CONVENIENT AND SIMPLE.

Unnecessary to Remove Globe Except to Clean.

The above cuts show Globe raised for lighting, trimming wick, cleaning and adjusting burner, etc., etc.

By the use of this improvement, the globe, globe rest and burner are securely fastened to the Lantern, making it a perfect Safety Lantern.

The advantage of this patent attachment will be observed at sight.

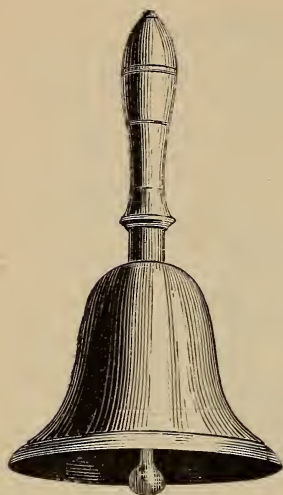

If you desire to handle the most complete Lantern ever made, order the "SAFETY TUBULAR LANTERN."
